## ARTIST'S STATEMENT

I deal primarily with the exploration of images rather than with new techniques in jewelry and metalsmithing. The object of my work is to move jewelry and metalsmithing away from more traditional forms which have some sense of serious practicality to forms which may have a use, yet play with the ideas that images may evoke.

I have reduced and changed large images in order that they may function in ways other than that for which they were originally intended, and yet the new image retains some semblance of the larger image which hints at the original function.
