Daily Step Count Profile Data for 61 Days [dataset]

Author: Elijah Meyer, Mark Greenwood, Tan Tran

DOI

<https://doi.org/10.15788/M2BC7C>

Date uploaded

April 2016

Description

N=61 days of step count totals over 15 minute intervals (96 per day). Each row contains a day of observations with the final three columns containing information about each day. Data described in more detail in paper along with R code provided for data analysis in its Appendix.
