THE COMMON EXPERIENCE

by

Ian Kuakini Patten

A thesis submitted in partial fulfillment of the requirements for the degree of

Master of Fine Art

MONTANA STATE UNIVERSITY
Bozeman, Montana

May 1993
APPROVAL

of a thesis submitted by

Ian Kuakini Patten

This thesis has been read by each member of the thesis committee and has been found to be satisfactory regarding content, English usage, format, citations, bibliographic style, and consistency, and is ready for submission to the College of Graduate Studies.

Date 4.19.93
Chairperson, Graduate Committee

Approved for the Major Department

ARTIST’S STATEMENT

My work originates from youthful experiences focusing on how they have formed and shaped me and the way I view the world around me. The sculptures evolved out of a period of self examination and a realization that these experiences are not unique to myself only, but are shared by a great number of people. When—these experiences are multiplied by the number of people who have felt them, they affect the world as a whole as we pass them along generation to generation. My personal role as an artist is to use the three dimensional presence of sculpture to communicate these experiences to the viewer.

Use of the figure is important to me because it provides the viewer with access to the work and changes the question from "What is it?" to "What is this about?". The figure draws the viewer in, and with the addition of other visual clues, such as broken glass or cast objects, forms the composite story. The viewers are then able to form associations with the work through references to their own experience.

I have an interest in other sculptors who use the autobiographical situation as a source for their work. H.C. Westerman’s sculptures are inspirational because the work evolves from his personal philosophy and life experiences rather than formal or theoretical ideology. Magdalena Abakonowicz’s torso pieces are examples of how to use the
character of the materials to define the meaning of the work. The result is work that is simple in its presentation, and yet, eloquent beyond words.

My sculpture has evolved from my childhood as a basement tinkerer and mad scientist. I would build objects from the stockpiles of war surplus material that my Grandfather had stored in the basement to escape from the turmoil of the adult world. It was also in the basement that I started my early experiments with electricity that eventually led to my work with Neon.

The pieces start out as rough sketches originating from the memory of a particular childhood incident. After the sketch I start to visualize the piece in different materials. The large sculptures are primarily constructed of metal, though I choose materials that best express the idea. "ROOTED CONVICTIONS" is about inflexibility and immobility during a long family conflict over the house I grew up in. Therefore, I felt it appropriate to construct it from the bark of the large, looming Eucalyptus trees which surrounded the house. In contrast, "UNTITLED II", evolved out of a moment of self discovery and is built of neon and steel rod in order to create an open, positive and expansive feeling. The small "TORSO SERIES" are self portraits in cast resin. The use of resin enables me to cast symbolic objects into the form of the figure and to use light to define its presence. Burlap and nails were always around the house when I was growing up and
the photographic transparencies recall my day as an undergraduate in Photography. The figure is based on a torso of Hermes at the DeYoung Museum in San Francisco. It represents youthful ideals about what I was, what I viewed myself as, and what I hoped to be. Some of the large sculptures are assemblies of smaller pieces. I use these in reference to the composite of a person with each piece representing experiences and knowledge. The assembly represents the way we spend our lives making the pieces fit and trying to hold them together. Based on my own experiences, the pieces are intentionally rough, battered and ill fitting. I use cutting wheels, torches, grinders and welders to achieve this look. Auto body metal provides a vast assortment of colors and shapes and is relatively easy to fabricate. I find some human forms already in the scrap metal and then hammer, cut and grind out the rest.

I fabricate the neon tubing in my portable shop. The glass is purchased in straight, four foot lengths. I heat the tubing over a gas and air flame to soften it. It is then bent over a pattern or by freehand. Electrodes are welded on and the tube is hooked up to a vacuum manifold. The tube is then superheated or "bombarded" as the term is known, allowed to cool and then filled with Neon or Argon gas. Color is determined by the type of gas and the type of phosphor coating on the inside of the tube. Neon gas in a clear tube is a bright red, while Argon is a pale violet. Mercury is usually
added to Argon gas to produce a bright blue color in a clear glass tube. Phosphor coated tubes have different chemical compounds in the coatings on the tube wall and when filled with Mercury-Argon gas produce a wide array of colors.

I use Neon primarily because of its low operating temperature, color range and plasticity. The use of light has been a continuing interest, because for me it represents energy, life and emotion. Light is an added dimension to the sculptures. As it emits through the open spaces of the work, it defines an internal presence. Essentially, the viewer is able to see both the interior and exterior of the work at the same time. I choose color according to the mood that I want to express. Cool colors (such as blue) represent solitude or isolation, while red indicates intensity or anger. In the large figure, "UNTITLED II", red and blue are combined to create a sense of vitality in contrast to the blue lonely feeling of "UNTITLED III" or the angry red intensity of "ROOTED CONVICTIONS".

The messages I send with this work are not the sole purpose of their creation. There is a cathartic experience in confronting painful issues and being able to release them, and there is also, in these works, the joy of creation. It is my hope that at the very least, these sculptures present themselves as visually interesting objects. Ideally, they should touch the viewer at the deepest levels. What the viewer comes away with is dependent on that person's background,
whether they are victim, perpetrator or bystander.
LIST OF TITLES

1. TORSO SERIES V
   18 x 9 x 6 inches
   Cast Resin, Vinyl Tubing, Neon

2. TORSO SERIES IX
   18 x 9 x 6 inches
   Cast Resin, Photo Tranparencies, Neon

3. TORSO SERIES VII
   18 x 9 x 6 inches
   Cast Resin, Nails, Neon

4. TORSO SERIES VI
   18 x 9 x 6 inches
   Cast Resin, Machine Nuts and Bolts, Neon

5. TORSO SERIES III
   18 x 9 x 6 inches
   Cast Resin, Burlap, Neon

6. TORSO SERIES VIII
   18 x 9 x 6 inches
   Cast Resin, Photo Transparencies, Neon

7. TORSO SERIES X
   18 x 9 x 6 inches
   Cast Resin, Electric Wire, Switches, Neon
8. UNTITLED II
   96 x 24 x 36 inches
   Steel, Neon

9. UNTITLED VI
   Front View
   77 x 77 x 34 inches
   Enameled Steel, Neon, Glass

10. UNTITLED VI
    Side View
    77 x 77 x 34 inches
    Enameled Steel, Neon, Glass

11. NIGHT VISITOR
    Front View
    108 x 84 x 22 inches
    Enameled Steel, Neon, Plaster, Sand

12. NIGHT VISITOR
    Rear View
    108 x 84 x 22 inches
    Enameled Steel, Neon, Plaster, Sand

13. UNTITLED VII
    120 x 74 x 24 inches
    Steel, Enameled Steel, Neon

14. UNTITLED VII
    Female Figure
    68 x 24 x 21 inches
    Steel, Enameled Steel, Neon
15. UNTITLED VII
Male Figure
74 x 24 x 28 inches
Steel; Enameled Steel, Neon

16. UNTITLED VII
Child Figure
48 x 13 x 7 inches
Steel, Neon

17. UNTITLED VII
Child Figure (detail view)
48 x 13 x 7 inches
Steel, Neon

18. ROOTED CONVICTIONS
144 x 64 x 67 inches
Steel, Eucalyptus Bark, Balsa Wood, Neon

19. ROOTED CONVICTIONS
Front Figure Detail
67 x 22 x 16 inches
Steel, Eucalyptus Bark, Neon

20. ROOTED CONVICTIONS
Rear Figure Detail
67 x 22 x 16 inches
Steel, Eucalyptus Bark, Neon
